Hi, I am a Software Engineering student at Politeknik Negeri Padang with a strong focus on building scalable web applications and designing robust, high-performance system architectures. Bridging the gap between deep technical execution and strategic project management, I specialize in full-stack engineering, microservices, and leading agile development teams to deliver impactful solutions.

Education & Projects

Politeknik Negeri Padang **2023-Present**
Information Technology
GPA: 3.9
Relevant Courses: Web Programming, Service-Oriented Architecture (Microservices)

Project Manager **Cantigi RentCar Website** **Jan 2024-Jun 2024**
Padang

- **Led and coordinated a cross-functional team of 4** to develop a comprehensive car rental web platform for PT. Wanderlust Cantigi International.
- **Implemented Agile methodology** to manage the project lifecycle, ensuring streamlined communication and iterative delivery of high-priority features.
- **Architected and developed the system** using PHP and the Laravel framework, leveraging the Filament plugin to build a highly efficient and intuitive administrative dashboard.
- **Collaborated directly with stakeholders** to translate business requirements into technical specifications, resulting in a scalable and user-centric solution.
- **Successfully deployed and maintained the production environment**, with the platform currently live and operational at cantigitours.com.

Backend Engineer **Microservices Library Management System** **August 2024-Jan 2025**

- **Engineered a scalable Microservices architecture** using **Java Spring Boot**, ensuring high availability and independent service deployment.
- **Orchestrated service discovery and routing** by implementing **Eureka Server** and **API Gateway** for seamless inter-service communication.
- **Integrated Kafka Message Broker** to handle asynchronous event-driven communication and implemented the **CQRS (Command Query Responsibility Segregation)** pattern to optimize data consistency and query performance.
- **Containerized all microservices using Docker** and built a robust **CI/CD pipeline with Jenkins**, significantly reducing deployment lead time and manual errors.
- **Established a comprehensive observability stack**, utilizing the **ELK Stack (Elasticsearch, Logstash, Kibana)** for centralized logging and **Prometheus with Grafana** for real-time infrastructure monitoring and alerting.

Fullstack Developer | **SIPAKER (Sistem Informasi Pelaporan Kerusakan)** | **Aug 2025-Dec 2025**

- **Developed and deployed a comprehensive full-stack web application** using **React and Next.js** to digitize and automate facility maintenance reporting for the General Affairs Sub-department at Politeknik Negeri Padang.
- **Architected a robust database schema using PostgreSQL and Drizzle ORM**, ensuring type-safe data operations and high-performance relational management.
- **Optimized system responsiveness by implementing Redis** as a caching layer, effectively reducing database load and improving data retrieval speed for recurring queries.
- **Engineered a secure authentication and authorization system using Auth.js**, implementing role-based access control (RBAC) for multiple user tiers, including reporters, technicians, and administrators.
- **Collaborated directly with the Head of General Affairs** to gather institutional requirements and translate them into a production-ready solution that improves reporting transparency and repair turnaround time.

Achievement

- **First Place** Winner of the Festika Typing Master Competition (2025)
- **First Place** Winner of the Cybertech Fast Typing Competition (2025)
- **First Place** Winner in the Cybertech Competitive Programming Competition (2025)

Organization & Volunteer

Head of Information Technology Department | **UKM Cybertech PNP** Padang | **Jan 2025 – Nov 2025**

- **Directed the IT Department's operations**, establishing structured training schedules and managing resources across the Programming, Multimedia, and Networking divisions.
- **Collaborated directly with division heads** to design, develop, and implement a comprehensive and up-to-date technical curriculum for all organization members.
- **Acted as the primary Person in Charge (PIC)** for the 2025 organizational workshop, overseeing the project timeline, resource allocation, and overall execution.
- **Spearheaded the organization's flagship event** by serving as the Project Lead for the national-level hackathon.

Project Lead – Hackathon National Cybertech | **UKM Cybertech PNP** Padang | **Nov 2025**

- **Orchestrated the end-to-end execution of a national-level hackathon** themed "Exploring the Vault," focusing on game development.
- **Successfully managed and facilitated 17 competing teams** throughout the event lifecycle, ensuring a smooth and competitive environment.
- **Forged a strategic partnership with the Founder of PeridotVault**, securing their involvement as the main collaborative partner and lead judge for the competition.

Project Lead – Workshop Programming | **UKM Cybertech PNP** Padang | **Oct 2024**

- **Organized and executed a highly successful technical workshop** themed "Learn Flutter from Zero", attracting an audience of 70 active participants.
- **Secured and coordinated with the Founder and CEO of Inatechno** as the keynote speaker, providing participants with industry-standard insights into mobile application development.

Technologies & Languages

Programming Languages

- **Java** (Library Backend)
- **PHP** (Cantigi Rentcar)
- **JavaScript / TypeScript** *(Used implicitly in React, Next.js, and Auth.js in the SIPAKER project)*

Frameworks & Libraries

- **Frontend / Full-stack:** React, Next.js (SIPAKER)
- **Backend:** Spring Boot (Library Backend), Laravel (Cantigi Rentcar)
- **Ecosystem & Plugins:** Filament (Laravel Admin Panel)

Databases, Caching & ORM

- **Relational Database:** PostgreSQL (SIPAKER)
- **In-Memory Data Store / Cache:** Redis (SIPAKER)
- **Object-Relational Mapping (ORM):** Drizzle ORM (SIPAKER)

Infrastructure, DevOps & Observability

- **Containerization:** Docker (Library Backend)
- **CI/CD:** Jenkins (Library Backend)
- **Logging:** ELK Stack - Elasticsearch, Logstash, Kibana (Library Backend)
- **Monitoring & Alerting:** Prometheus, Grafana (Library Backend)

System Architecture & Messaging

- **Architecture Design:** Microservices, CQRS Pattern
- **Service Management:** API Gateway, Eureka Server (Library Backend)
- **Message Broker / Event Streaming:** Kafka (Library Backend)

Security & Authentication

- **Authentication:** Auth.js / NextAuth (SIPAKER)

Project Management & Methodologies

- **Methodology:** Agile (Cantigi Rentcar)
